

SERVICES | CUSTOMER TESTIMONIAL

“Without MiTek Services, we wouldn’t have the capacity to be doing the volume of work that we’ve been doing.”

NATE SHLISKY - General Manager, Desert Truss

PROBLEM

In 2019, Desert Truss was ready to grow its business but experienced challenges in finding and training quality designers.

SOLUTION

Desert Truss extended its team by adding three designated designers through MiTek Services. These highly educated expert designers became an extension of the Desert Truss team, working exclusively for the company.

Location: Las Vegas, Nevada

Company Size: +/- 80 Employees

Founded: 1989

OUTCOME

Today, MiTek Services designers working for Desert Truss work on custom homes, multi-family projects, and single-family track homes. With fewer distractions than a local designer, these designers have helped Desert Truss deliver faster results to customers. They have developed a steady workflow with a Desert Truss colleague who reviews their work and communicates on their behalf with customers, making Desert Truss a 24-hour operation.

“A typical multi-family project might take 6-8 weeks to design. The Vietnam team completed the designs in 3 weeks. It was absolutely worth the investment.”

Are you ready to expand the capabilities of your team without the hassle of direct employment?
