

COMPONENT MANUFACTURER

TRANSFORMING YOUR EXPERIENCE

When it comes to protecting profits and staying green lit for the work ahead, count on your trusted partner for what matters most.

MiTek solutions help our component manufacturer partners maximize their operational productivity and gain reliable access to innovative software, all while we provide high-touch technical support, so you can keep delivering for your customers.

AUTOMATED SOLUTIONS

Increase plant efficiency and reduce labor requirements with integrated automation solutions.

FEATURED OFFERINGS

NEW! **MiTek® Guardian™** A preventative maintenance program that helps you protect your operations from disruption caused by out-of-service machines.

POWERED BY SIEMENS **Hornet II™ Saw** A precision cutting and labeling upcut saw with software-driven optimizations that reduce waste and enhance productivity.

RailRider Pro® A high-volume through-put in floor truss assembly, ensuring a full plate embedment each pass.

RoofTracker III™ A high-powered roller gantry that presses the top and bottom plates in a single pass.

Finish Roller II™ A finishing press that completes the embedding of plates as the final step in a 2-stage pressing process.

COMPLETE INTEGRATION

Get the **MatchPoint® DirectDrive™** System for its customizable operation of multiple MiTek machines for unparalleled efficiency and speed.

- Ranger™ Retrieval System
- MatchPoint® BLADE II™ Saw
- Component Delivery System
- Wizard PDS®

ENGINEERED PRODUCTS

Access a full range of engineered solutions to deliver solutions that transform how your customers build.

FEATURED OFFERINGS

NEW! Concealed Connectors

CPBQ post anchors secure wood posts to concrete footings, and CJHQ joist hangers secure wood joists to posts and beams, featuring innovative methods for easier installation and improved appearance.

Fire Wall Hanger

The industry's most labor-saving solution for attaching floor framing to 2-hour fire-rated walls in wood frame construction.

Hardy HFX Shear Panel

Optimize your wall system with a cost-effective prefabricated shear wall panel that enables narrower walls and larger openings.

Posi-Strut® Metal Web

Provide a more space-efficient solution for shallow-depth floors, offering increased utility access and design continuity.

**MACHINERY
SPECS**

SOFTWARE

Maximize productivity with industry-leading structural design and operations management software.

NEW!

MiTek® Cloud™ is now built on Microsoft Azure, offering a reliable cloud service for seamless access to your MiTek CM Software Suite.

MiTek® CLOUD™

BUSINESS OPERATIONS

MiTek® Management™ is the only tool you need to manage every aspect of your business with real-time dashboards, role-based access, and deep configurability.

**MiTek®
MANAGEMENT™**

DESIGN & ESTIMATING

MiTek® Structure™ delivers the most powerful structural 3D modeling, editing, and estimating functionality in the industry.

**MiTek®
STRUCTURE**

ESTIMATING & PLANNING

MiTek® Supply™ is the comprehensive solution for whole-house estimating, engineered wood products, framing layout, and lumber design, enabling the generation of more accurate quotes.

**MiTek®
SUPPLY**

ESTIMATING & PLANNING

MiTek® Viewer™ is a free CAD tool that connects home builders and building materials suppliers for virtual jobsite reviews using shared 3D models.

**MiTek®
VIEWER™**

MANUFACTURING

MiTek® Production™ is software designed to enhance production performance by providing a comprehensive view of all the production activities happening in the plant for walls and trusses.

**MiTek®
PRODUCTION**

DESIGN

MiTek® Truss Validator™ is a free web tool for engineers and architects to confidently validate the feasibility of floor trusses in their designs.

**MiTek®
TRUSS VALIDATOR**

Microsoft Azure is a trademark of the Microsoft group of companies.

SERVICES

Expand your capabilities in design, estimating, and manufacturing with skilled services.

Dedicated Services

Provides university-educated professionals to handle your technical work and fuel your business growth.

→ Component Estimating, Production-Ready Designs & Optimization

- Floors, Roofs, Walls
- Single & Multi-Family

→ Take-Offs

- Whole House
- Lumber
- Hardware
- Drywall, Flooring & Cabinets

→ Kitchen & Bath Design

Plant Optimization Service

Offers customized plant layouts using 3D designs to enhance efficiency, minimize waste, and maximize labor productivity.

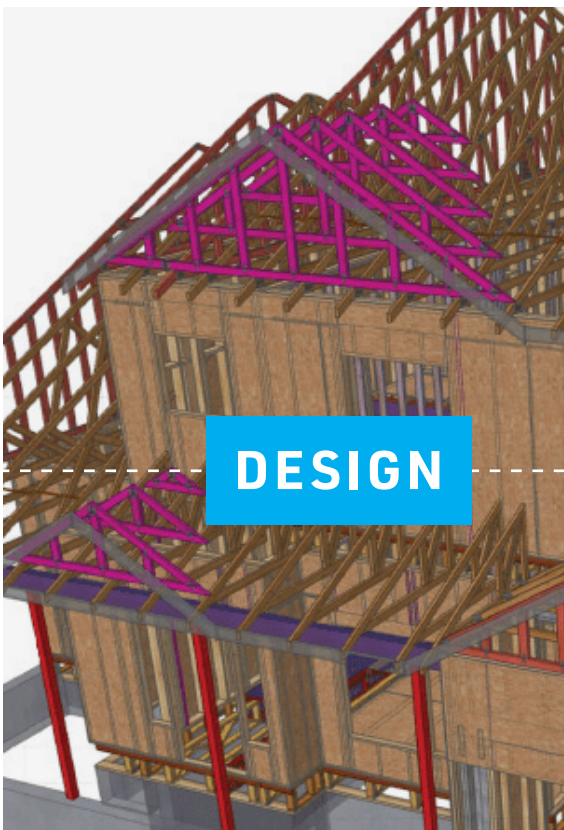

HIGH-TOUCH SUPPORT

We are committed to transforming your software support experience with more field-based and helpdesk representatives, ensuring you receive the technical assistance you need.

- More representatives to provide technical assistance
- A rich collection of software training videos
- Extensive help pages
- Additional training documentation

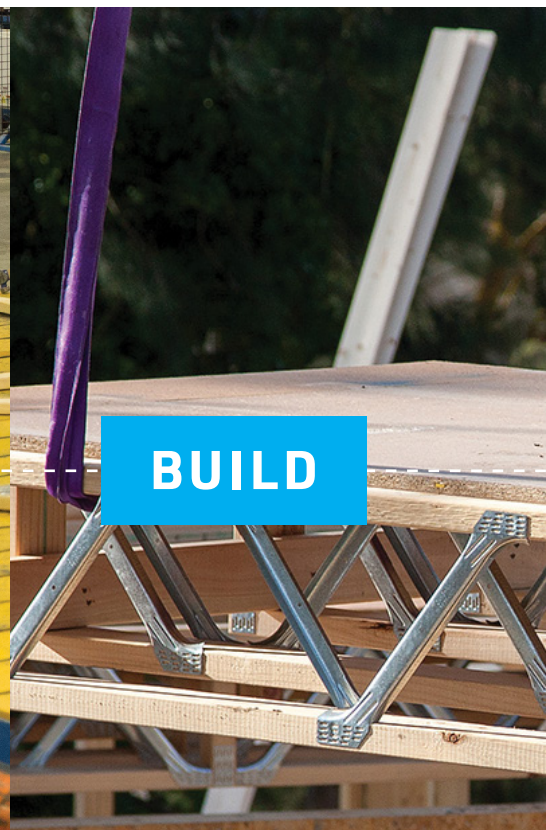

DESIGN

MAKE

BUILD

UNLOCK THE POWER OF DESIGN-MAKE-BUILD™

Maximize production and fuel your growth with MiTek's integrated off-site technologies.

DESIGN

Enhance your team's efficiency and scale operations with our powerful design and modeling software, featuring highly configurable automation options.

MAKE

Streamline your production using our comprehensive selection of cutting, assembling, and material handling tools and software to enhance your entire workflow.

BUILD

Help your customers build better quality homes more efficiently and safely with off-site construction solutions.
